

# TOYMAN DISPLAYS

*Toy Auctioneers & Valuers*

Thank you for requesting our brochure, as you can see from the price list and size sheet our range is designed to accommodate any collectors requirements, the shelf sizes of 3", 4" and 6" are exact less the small amount taken off when grinding the edges, the sizes are taken from the outside of the carcass to get the inside measurement deduct 30mm or just under 1 inch.

To calculate how many models your proposed cabinet would hold we suggest you cut a piece of paper to the required depth and width e.i. 24x36x3 vertical = 3" by 23" multiply by 13, 12 shelves are provided plus the bottom = 13 altogether, the shelf spacing are drilled approximately every 15mm or 1/2 inch to give you infinite adjustability to give you a guide the TM2V 3" will hold approximately 117 Lledo. The spacing between shelves if 12 shelves are used is approximately 68 mm or 2 3/4" including the bottom and will accommodate most Corgi, matchbox, Vittess, Brumm, Lledo and Vanguard and EFE in the 1.43rd scale. Larger models e.g. 1.24<sup>th</sup> will require a 4" shelf width and 1.18<sup>th</sup> a 6" shelf width

PRIORITY ORDER FORM

Finish	Order no	Background colour If not standard	Depth 3" 4" 6"	Plus optional background	Mirror or green baize	Cost of cabinet	P&P	Total
